Where Used Dashboard

Introduction

Create a new Where Used Dashboard which will consolidate pertinent information together allowing users to research a product without having to access multiple pages.

Objective

Automate nearly all the manual steps in the current process by bringing together the most pertinent information [raw numbers and calculated results] onto the Where Used Dashboard.

The page will offer multiple links to existing pages some of which will be enhanced so the user will be only one click away from information that used to require them to visit multiple pages.

The page will offer columns which display the most important, at-a-glance information needed by the user and provide an option to create a CSV download file that will allow to take all of the information to a spreadsheet for further analysis.

Where Used Dashboard

Scope

This project will be designed and delivered with the following release and version levels:

HarrisData HD5.0 115166
IBM i V7R1M0

This project will be based on the HTML User Interface. The Legacy User Interface will continue to work as it does today.

Minor changes may be made to the design as the enhancement is coded. These changes are made to correct issues discovered in developing the enhancement that were not found during the design. If any changes are made they will be included in the copy of the design you receive with the final product delivery. This design will also serve as your documentation until the User Documentation is updated.

Where Used Dashboard

Programming Requirements

Where Used Dashboard

When the new 'Where Used Dashboard' is selected from the Item portal on the Item/Plant Select page (Figure 3), the Where Used Dashboard (Figures 1 & 2) will be displayed and provide the following functionality:

- Header icons (Figure 2)
 - The dashboard icon  links to the Explosion Dashboard for the Item/Plant.
 - The display bar graph  and hide bar graph  icons toggle the display of the bar graphs shown in Figure x.
 - The home icon  will return the user to the Item/Plant Select page (Figure 3).
 - The download icon  will generate a csv file and place it in your current download folder. Refer to the Download CSV File section for additional information.
 - The printer friendly icon  will open a new tab and display the current page excluding the menu bar.
- Header Information displayed for the selected Component Item:
 - Plant – links to the Plant Select page
 - Item – links to the Item/Plant Select page (same as the home icon)
 - Quantity On Hand – links to Stock Variance
 - On Hand Floorstock
 - Quantity Available – links to Available To Promise
 - Cost (if displayed and Part Type is 'M' or 'B') – links to Cost Simulator
 - The display of Cost and Extended Cost is controlled by program name 'ITEMCOST'. Refer to the Explosion Dashboard->Program Option Security section for additional information.
 - Anticipated Annual Usage
 - Pegged Requirements

Where Used Dashboard

- View checkboxes:
 - Level 1 - if checked, only rows with Level = 1 are displayed
 - Active Only - if checked, only rows with Status (PDM109/PZIMAC) not equal to (I) Inactive will be displayed.
- Column Links
 - Level – links to the Explosion Dashboard
 - Item Number – links to Item Select
 - Description – links to Item/Plant Select
 - Quantity On Hand – links to Stock Variance
 - Quantity Available – links to Available To Promise
 - Cost (if displayed and Part Type is 'M' or 'B') – links to Cost Simulator
- Hover Text on the following columns will display the calculation of the value displayed. The following examples are based on Item Number M10AE (Figure 3):
 - YTD Usage
 - Percent of Total = 15.00 (3.0000 / 20.0000)
 - Last Year YTD Usage
 - Percent of Total = 17.59 (35.0000 / 199.0000)
 - Last Year Total Usage
 - Percent of Total = 11.73 (38.0000 / 324.0000)

Where Used Dashboard

All columns displayed on the Where Used Dashboard (Figures 1 & 2) can be sorted and searched on.

Figure 1

Where Used Dashboard

Based on the example in the 'Where Used Bucket Configuration' (Figure 5), four buckets are displayed for usage (Figure 2). Each bucket displays a heading with the range of days included. Hover text on the headers (0 - 30 Days) will display the actual dates used (08-01-19 to 08-30-19) for that bucket. There are separate columns for Dependent and Total usage. Dependent Usage is the sum of Sales and Issues (for the bucket range) of the Parent Item multiplied by the Quantity Per of the Component Item. Total Usage is the sum of Sales and Issues (for the bucket range) of the Component Item. Hover text on the Dependent usage value will display 'Percent of Total = xxx.xx'.

Cost/Extended: 28.4311 / 148,524.1708
Anticipated Annual Usage: 726.0000
Pegged Requirements: 2,476.0000

Download CSV File

When the download icon  is selected from the Where Used Dashboard (Figure 1), a csv file is created in your current download folder with the name: Where_Used_<plant>_<item>.csv (i.e. Where_Used_11_101505.csv) and will contain all of the columns in the Indented Where Used work file (PDM109) (except for Hex Handle and costs if not authorized) and will also include the header information of the Component Item (which repeats for each Parent) as shown in the following example:

	A	B	C	D	E	F	G	H	I	J	K

Where Used Dashboard

Where Used Bucket Configuration

New 'whereUsedBucketXX' (XX = 01 – 12) parameters will be added to the Configuration->Control Panel Plus->EIP Configuration BaseFormat.icl file. This allows the user to control how many buckets display on the Where Used Dashboard (Figure 2). Another parameter 'whereUsedIncrement' controls if the value entered in the buckets is Days (D) or Months (M). The values must be assigned beginning with the first parameter 'whereUsedBucket01' and each successive value must be greater than the previous.

EIP Configuration

File: Base Format [BaseFormat.icl]

Parameter	Description	Value

Page: 1 of 1

Opt	Parameter	Description	Value
  	whereUsedBucket01	Where Used Dashboard Bucket 1	30
  	whereUsedBucket02	Where Used Dashboard Bucket 2	60
  	whereUsedBucket03	Where Used Dashboard Bucket 3	90
  	whereUsedBucket04	Where Used Dashboard Bucket 4	120
  	whereUsedBucket05	Where Used Dashboard Bucket 5	
  	whereUsedBucket06	Where Used Dashboard Bucket 6	
  	whereUsedBucket07	Where Used Dashboard Bucket 7	
  	whereUsedBucket08	Where Used Dashboard Bucket 8	
  	whereUsedBucket09	Where Used Dashboard Bucket 9	
  	whereUsedBucket10	Where Used Dashboard Bucket 10	
  	whereUsedBucket11	Where Used Dashboard Bucket 11	
  	whereUsedBucket12	Where Used Dashboard Bucket 12	
  	whereUsedIncrement	Where Used Dashboard Increment	D
