Purchasing In EIP III

Introduction

Enhance the Purchase Order processing in EIP to allow the users to perform all necessary maintenance tasks and eliminate the need to use the legacy interface except for receiving.

Objective

Add the following Purchase Order functionality to the HTML interface:

- Allow maintenance to existing Purchase Orders.
- Provide an easy way to update the Required Date for all open detail lines on an existing Purchase Order.
- Enhance the Purchase Order creation to include comments, drop ship and all Purchase Order Header fields.
- Add a link from the MRP Planned Order Page to add an item to a Purchase Order.
- Add a Reset Purchase Order Busy Flag option to the Distribution Utilities page.
- Allow for reopening of a closed Purchase Order.

Scope

This project will be designed and delivered with the following release and version levels:

HarrisData HD5.0 115166
IBM i V7R1M0

This project will be based on the HTML User Interface. The Legacy User Interface will continue to work as it does today.

Minor changes may be made to the design as the enhancement is coded. These changes are made to correct issues discovered in developing the enhancement that were not found during the design. If any changes are made they will be included in the copy of the design you receive with the final product delivery. This design will also serve as your documentation until the User Documentation is updated.

Purchasing In EIP III

Programming Requirements

Create Purchase Order

Provide the ability to add/maintain header and trailer comments for a Purchase Order. Detail comments must be added after the Purchase Order is created because no line numbers are assigned yet and items can be summarized into a single line.

Add a Comment Maintenance icon  to the Create Purchase Order page (Figure 1). This will display the PO Comments page (Figure 2) in a popup window.

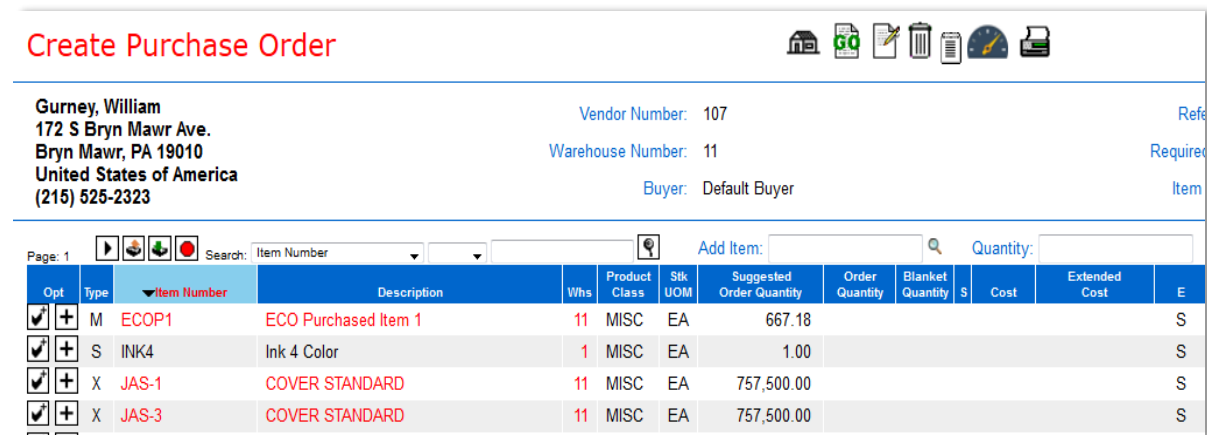

Figure 1

The PO Comments page (Figure 2) displays all documents with an Application ID of 'PO' or blank. If comments exist the  icon is displayed. If no comments exist, the  icon is displayed. If either icon is selected from one of the Vendor/Document Header/Trailer columns, the Order Header/Trailer will be default and display the PO Comment Maintain page (Figure 3).

Use the Close icon  to return to either the Create Purchase Order page (Figure 1) or the Purchase Order page (Figure 5).

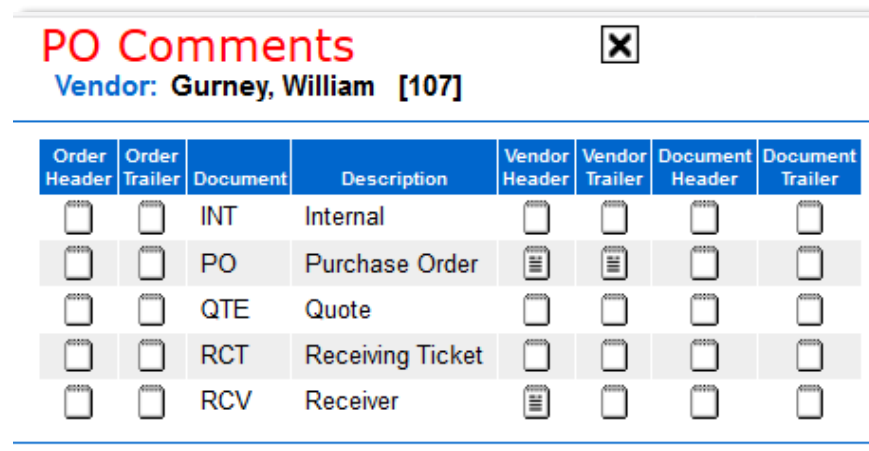

Figure 2

Purchasing In EIP III

The following icons are available:

	Specification Search (Figure 4)
	Accept changes to comments and returns to PO Comments (Figure 2)
	Clear all comments and redisplay PO Detail Comment Maintain (Figure 3)
	Close PO Detail Comment Maintain window without update and return to PO Comments (Figure 2)

[illegible]

Figure 3

When a Specification is selected, the comments on the PO Header Comment Maintain page (Figure 3) will be replaced with the Specification comments.

Specification Search

Vendor: Martin Data Service [112]

Document: Purchase Order [PO]

Specification	Description

Page: 1 of 1

Specification	Description
TEST	New Spec
PAPER	Paper
STAPLES	Staples
TOILET PAPER	Toilet Paper 2-ply

Figure 4

Purchasing In EIP III

Purchase Order Maintenance

The Purchase Order page (Figure 5) will be enhanced to allow the user to do maintenance. The availability of the maintenance icons will be based on Program Option Security for program HPOPEM. If the Purchase Order is busy (POPOMS/POBUSY = 'B') due to a user being in maintenance or receiving in legacy, none of the icons will display as shown in Figure 7. If the Purchase Order is closed, the Purchase Order page will look like Figure 6.

The following header icons will be added:

Icon	Description	Security Required
	Header/Trailer Comment Maintenance	Change
	Change Required Dates	Change
	Close Purchase Order (if receipts)	Close/Cancel/Reopen
	Cancel Purchase Order (if no receipts)	Close/Cancel/Reopen
	Reopen Purchase Order (if order is closed)	Close/Cancel/Reopen

The following detail icons will be added:

Icon	Description	Security Required
	Detail Comment Maintenance	Change
	Detail Comment Maintenance	Change
	PO Item Maintenance	Change
	Delete Detail Line (if no receipts)	Change
	Close Detail Line (if receipts)	Close/Cancel/Reopen
	Add Detail Line	Add

The Quantity Ordered column will be a link to the PO Blanket Line Maintenance (Figure 16) if the following conditions are met:

- Line status is Open (POPOMD/PDSTAT='O')
- Quantity Received is zero or the line type is already a Blanket Line (POPOMD/PDPOLT='B')

Purchasing In EIP III

Detail columns for Status (S) and Entry Type (E) will be added to the Purchase Order inquiry (Figure 5).

Purchase Order Item Detail

The Purchase Order Item Detail tab (Figure 10) will be changed as follow:

- For Stock Items (Entry Code 'S' or 'X')
 - Warehouse Name will link to the Item/Whs Select page.
 - Item Description will link to the Item Select page.
- The update row  and update comments  icons will display if the user has 'Change' authority and the line Status is Open.
 - The update row icon will display the PO Item Maintenance page (Figure 12) in a popup window.
 - The update comments icon will display the PO Comments page (Figure 14) in a popup window.
- Add a 'Quantities' box to display the current quantities for the line. Ordered and Open always display. To Stock, To Receiving, Held In Receiving, Returned To Vendor and To Floorstock only display if they are not zero.

Figure 10

Purchasing In EIP III

PO Header Maintenance

The PO Header Maintenance page (Figure 11) allows the user to update values in the Purchase Order Header table (POPOMS). This maintenance provides the following functionality:

- Vendor, Order Type and Warehouse are display only.
- Required Date is the only required value.
- FOB, Ship Via and Terms will default from the Vendor if the value is blanked out.
- User-Defined columns are only displayed if they are setup for the Order Type.
 - Exit points will be processed if defined.
- When the Accept icon ☒ is selected and there are no errors, the Purchase Order Header table (POPOMS) will be updated, the PO Header Maintenance window will close and the Purchase Order Header tab will be refreshed to reflect any changes.
- If a Drop Ship is added or removed, all detail line Item/Whs quantities for On Order and Drop Ship will be updated appropriately.

PO Item Maintenance – Update Line

The PO Item Maintenance page (Figure 12) allows the user to update values in the Purchase Order Detail table (POPOMD). This maintenance provides the following functionality:

- Item Number can only be changed if the Entry Code is 'N' Non-Stock and Quantity Received is zero.
- Warehouse Number can only be changed if Quantity Received is zero.
- If Cost is entered, that is an override. If Cost is blanked out it will default based on Vendor Pricing.
- Entry Code 'S' Stock Item or 'X' Stock Item – No Affect on Inv
 - Item Description, Stocking U/M and Product Class will default from the Item table (HDIMST) if not entered or blanked out.
 - Purchasing U/M will default from the Item/Whs table (HDIWHS) if not entered or blanked out.
 - Entry Code cannot be changed to 'N' Non-Stock from 'S' or 'X'.
- The Required Date for Stock Items can be defaulted to the current date plus Lead Time using the  icon. The calculation of lead time will be based on the following hierarchy:
 - Vendor Item Warehouse (HDVCIW/WILT)
 - Vendor Item (HDVCIT/VCLT)
 - Item Warehouse (HDIWHS/IWPULT)
 - Vendor (HDVEND/VMLTME) - this is only used if the 'poCheckVendorLeadTime' in BaseFormat.icl is set to 'Y'.
 - In addition, the Item/Plant Safety Lead Time will be added to the lead time determined above to get a total lead time added to the current date.
- The 'Current Quantities' box on the right only displays if something has been received. Ordered and Open will always display. The following only display if they are not zero:
 - To Stock
 - To Receiving
 - Held In Receiving
 - Returned To Vendor
 - To Floorstock
- When the Accept icon  is selected and there are no errors, the Purchase Order Detail table (POPOMD) will be updated, the PO Item Maintenance window will close and the page this was accessed from will be refreshed to reflect any changes.

PO Item Maintenance – Add Line

When the add row icon  is selected from the Purchase Order Open Order tab (Figure 5), the PO Item Maintenance page (Figure 11) is displayed and provides the following functionality:

- Defaults the Warehouse Number and Required Date from the Purchase Order Header.
- Defaults the Entry Code to 'S' Stock Item.
- Stock Item (Entry Code 'S' or 'X') required values:
 - Item Number – must exist in the Item table (HDIMST)
 - Order Quantity
- Non-Stock Item (Entry Code 'N') required values:
 - Item Number – cannot exist in the Item table (HDIMST)
 - Item Description
 - Order Quantity
 - Stocking and Purchasing U/M
 - Product Class

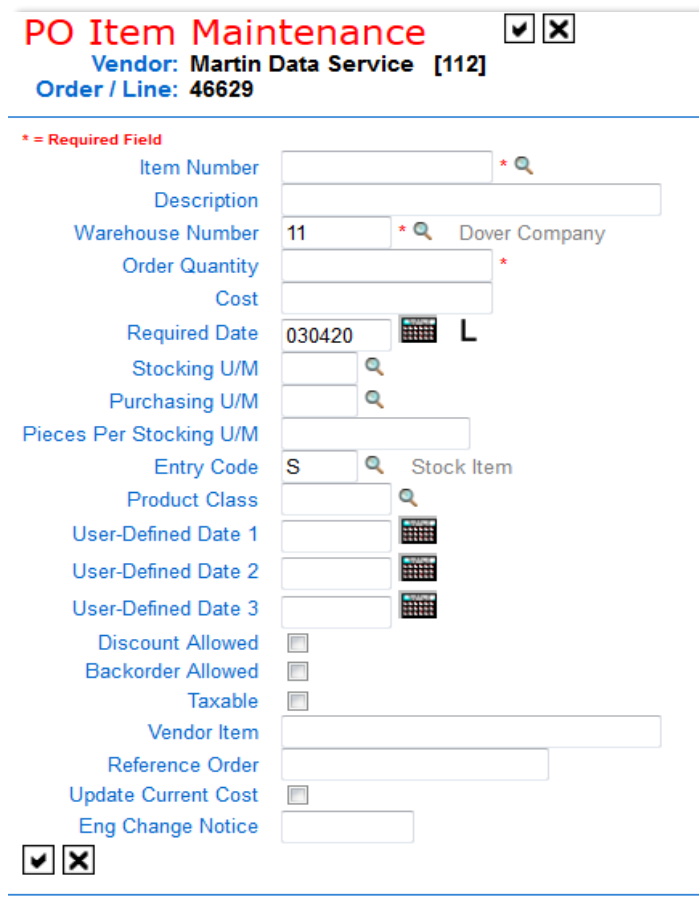

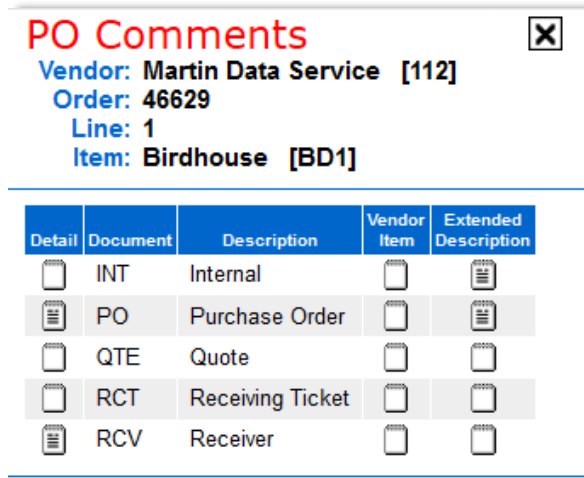

Figure 13

PO Comments

The PO Comments page (Figure 14) displays all documents with an Application ID of 'PO' or blank. If comments exist the  icon is displayed. If no comments exist, the  icon is displayed. If either icon is selected from one of the Vendor Item or Extended Description columns, the Detail will be defaulted and display the PO Comment Maintain page (Figure 15).

Use the Close icon  to return to either the Item Detail tab (Figure 10) or the Open Order tab (Figure 5)

The PO Comments window has a title bar with a close button. Below the title bar, it displays the following information: Vendor: Martin Data Service [112], Order: 46629, Line: 1, and Item: Birdhouse [BD1]. Below this information is a table with five columns: Detail, Document, Description, Vendor Item, and Extended Description. Each row in the table has a document icon in the Detail column. The rows are: INT Internal, PO Purchase Order, QTE Quote, RCT Receiving Ticket, and RCV Receiver.

Detail	Document	Description	Vendor Item	Extended Description
	INT	Internal		
	PO	Purchase Order		
	QTE	Quote		
	RCT	Receiving Ticket		
	RCV	Receiver		

Figure 14

The following icons are available:

	Specification Search (Figure 4)
	Accept changes to comments and returns to PO Comments (Figure 14)
	Clear all comments and redisplay PO Detail Comment Maintains (Figure 15)
	Close PO Detail Comment Maintain window without update and return to PO Comments (Figure 14)

The PO Detail Comment Maintain window has a title bar with a search icon, a checkmark icon, a document icon, and a close icon. Below the title bar, it displays the following information: Vendor: Martin Data Service [112], Order: 46629, Line: 1, Item: Birdhouse [BD1], and Document: Purchase Order [PO]. Below this information is a text area with the following text: Drawing Number: 87987987987. This is an Item extended description comment for BD1. You can enter as many lines as you need. Below the text area is a button labeled Comments.

Comments

PO Blanket Line Maintenance

The PO Blanket Line Maintenance page (Figure 16) provides the following functionality:

- Releases that are Closed cannot be changed or deleted.
- The entry line allows you to add a new release by pressing Enter or selecting the Add icon . Required Date and Blanket Quantity are not required, but only releases that have a Blanket Quantity will be used.
- As new releases are added or an existing release is deleted, the Variance Quantity is updated.
- When the Accept icon  is selected, the following editing is done:
 - Required Dates are validated against the Schedule.
 - Total Blanket Quantity must be equal to the Order Quantity.
 - If no errors are found:
 - Update the Purchase Order Detail (POPOMD) with the changes.
 - Close the PO Blanket Line Maintenance window.
 - Refresh and display the Open Order tab (Figure 5)

Confirmation Alerts

The 'Confirm cancel of Purchase Order' popup is displayed when the Cancel Purchase Order icon  is selected from the Purchase Order header (Figure 5). If OK is selected, all rows in the following tables for the Purchase Order will be deleted:

- Purchase Order Header (POPOMS)
- Purchase Order Detail (POPOMD)
 - For each line deleted:
 - Update the Item/Whs (Quantity on Order/Drop Ship).
 - If linked to an Order Entry Order, remove the link.
- Purchase Order Comments (POOCMT)

If there is a previous Purchase Order for the Vendor, that will be displayed on the Purchase Order page (Figure 5). If not, the Vendor Select page will be displayed.

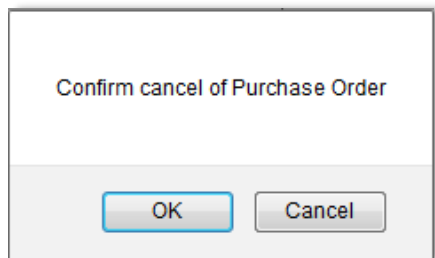

Figure 18

The 'Confirm close of Purchase Order' popup is displayed when the Close Purchase Order icon  is selected from the Purchase Order header (Figure 5). If OK is selected, the following updates will occur;

- Purchase Order Header (POPOMS)
 - Status (POSTAT) is set to 'C' Closed
- Purchase Order Detail (POPOMD)
 - Any detail line with a Status (PDSTAT) = 'O' Open will be set to 'C' Closed.
 - For each line set to closed:
 - Update the Item/Whs (Quantity on Order/Drop Ship).
 - If linked to an Order Entry Order, remove the link.
- Redisplay the Purchase Order page (Figure 6)

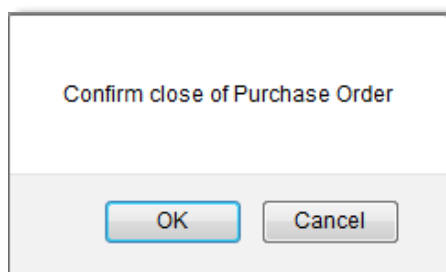

Figure 19

Purchasing In EIP III

The 'Confirm close of:' popup is displayed when the Close Line icon  is selected for a detail line from the Open Order tab on Purchase Order (Figure 5). If OK is selected, the following updates will occur;

- Set the Status (PDSTAT) to 'C' Closed.
- Update the Item/Whs (Quantity on Order/Drop Ship).
- If linked to an Order Entry Order, remove the link.

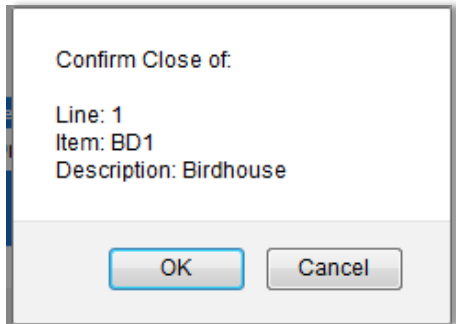

Figure 20

The 'OK to delete?' popup is displayed when the Remove Row icon  is selected for a detail line from the Open Order tab on Purchase Order (Figure 5). If OK is selected, the following updates will occur;

- Delete Purchase Order Detail (POPOMD) and Purchase Order Comments (POOCMT) for the Purchase Order/Line
- Update the Item/Whs (Quantity on Order/Drop Ship).
- If linked to an Order Entry Order, remove the link.

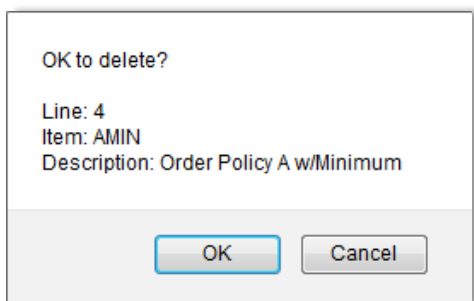

Figure 21

Purchasing In EIP III

Update Required Dates

The Update Required Dates page (Figure 22) is displayed when the  icon is selected from the Purchase Order header (Figure 5). When a valid date is entered and the Accept icon  is selected, the following will occur:

- Required Date is **not** validated against the Schedule.
- Update all Purchase Order Detail (POPOMD) lines that meet the following criteria:
 - Line Status is Open (PDSTAT='O')
 - Line Type is not a Blanket (PDPOLT=' ')
- Close the window and redisplay the previous page.

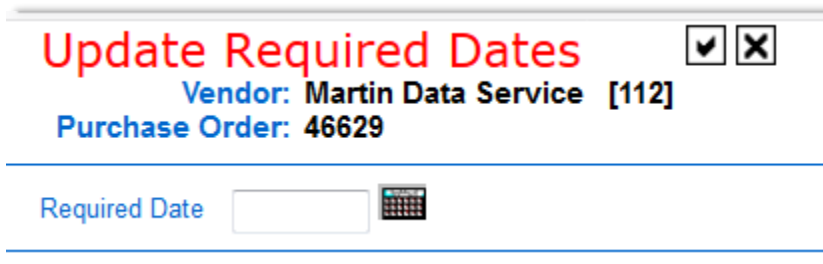

Figure 22

Purchasing In EIP III

Reopen Closed Purchase Order

Add an icon  to the Purchase Order History page (Figure 23) to allow the user to reopen a closed Purchase Order. This icon will only display if the Purchase Order status is Closed (POPOMS/POSTAT='C') and they have program option security to 'Close/Cancel/Reopen' for program HPOPEM. When the link is selected, the confirmation box (Figure 24) will be displayed. If OK is selected, the Purchase Order status will be change to Open (POPOMS/POSTAT='O'). This will **not** change the Status of any detail lines (POPOMD/PDSTAT).

MRP Planned Orders

Add icon **P** 'Click here to add item to a Purchase Order' to the Manufacturing->MRP->Planned Orders list widget page (Figure 25). The icon will only display if the user has program option security of 'Add' for program HPOPEM.

When the icon is selected, one of the following will occur:

1. If the user has started a Purchase Order, the item will be added to the current Purchase Order with the Order Quantity set to the Planned Order Quantity. The Create Purchase Order page (Figure 1) will be displayed. The home icon  can be used to return to the MRP Planned Orders page (Figure 25).
2. If a Purchase Order has not been started, the PO Header Maintenance page (Figure 26) will be displayed with the following defaults from HDMPLM:
 - Vendor = Vendor (PLVEND)
 - Buyer = Buyer/Analyst Code (PLBAC)
 - Required Date = Due Date (PLDAT)

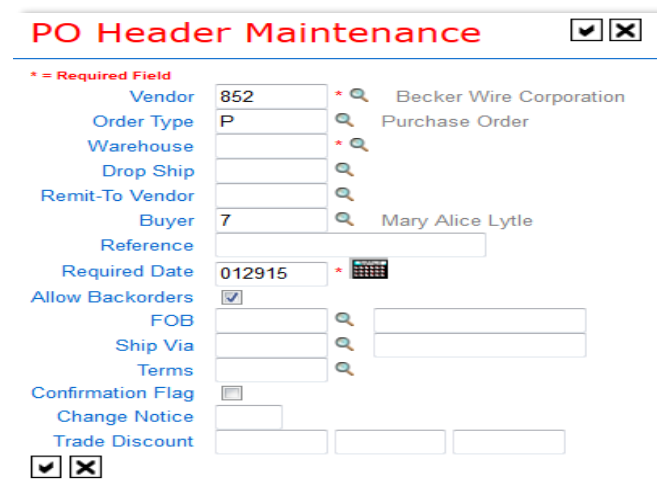

Once the PO Header Maintenance is accepted, the selected item will be added to the Purchase Order and the user will be returned to the Create Purchase Order page (Figure 1).

The screenshot shows the 'MRP Planned Order' page. At the top, there are icons for home, refresh, print, and download. Below the title, there's a search bar with 'Item Number' and a magnifying glass icon. A 'View:' section has checkboxes for 'Manufactured' (checked) and 'Purchased'. The main table has columns: Opt, Plant, Item Number, Item Description, Part Type, Buyer/Analyst Name, Planned Order Quantity, Due Date, Start Date, and Component Shortage. There are four rows of data, each starting with a 'P' icon in the 'Opt' column.

Opt	Plant	Item Number	Item Description	Part Type	Buyer/Analyst Name	Planned Order Quantity	Due Date	Start Date	Component Shortage

Figure 25

The screenshot shows the 'PO Header Maintenance' form. It has a title bar with a checkmark and an 'X' icon. Below the title, there's a section for 'Required Field' with a red asterisk. The form contains several fields with labels and values: Vendor (852), Order Type (P), Warehouse, Drop Ship, Remit-To Vendor, Buyer (7), Reference, Required Date (012915), Allow Backorders (checked), FOB, Ship Via, Terms, Confirmation Flag, Change Notice, and Trade Discount. There are also search icons next to some fields.

Reset Purchase Order Busy Flag

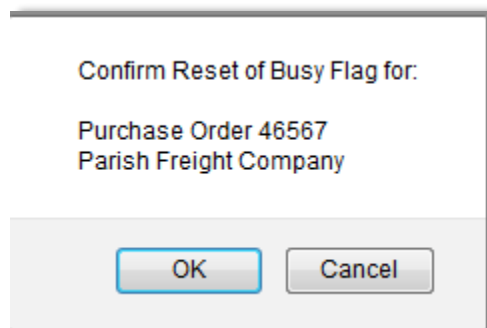

Add new option to 'Reset Purchase Order Busy Flag' (Figure 27) will be added to the Utilities->Distribution page. When the Purchase Order link is selected, the confirmation box (Figure 28) will be displayed. If OK is selected, the Purchase Order Busy flag (POPOMS/POBUSY) will be reset and the Purchase Order will be removed from the list.

The screenshot shows a web application titled "Reset Purchase Order Busy Flag" in red text. Below the title is a search bar with a dropdown menu set to "Purchase Order" and a search icon. To the left of the search bar, there are three small icons: a red flag, a green flag, and a red circle. Below the search bar is a table with three columns: "Purchase Order", "Vendor Number", and "Vendor Name". The table contains three rows of data:

Purchase Order	Vendor Number	Vendor Name
46508	108	Haliday Distribution
46567	115	Parish Freight Company
46579	111	Latham Warehouse

Figure 27

The screenshot shows a confirmation dialog box titled "Confirm Reset of Busy Flag for:". The dialog box contains the following text:

Purchase Order 46567
Parish Freight Company

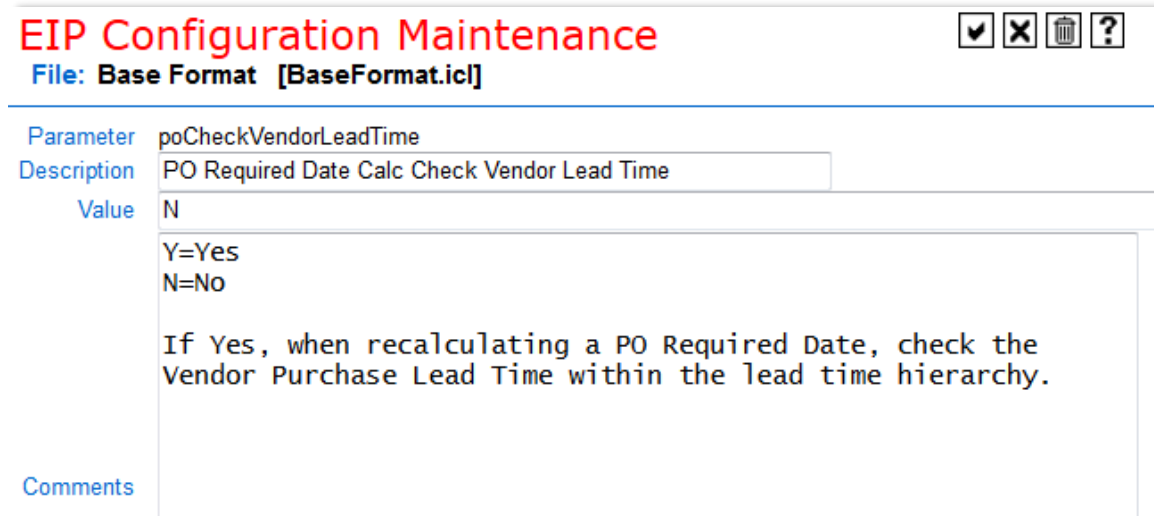

At the bottom of the dialog box are two buttons: "OK" and "Cancel".

EIP Configuration

A new 'poCheckVendorLeadTime' parameter will be added to Control Panel Plus->EIP Configuration->BaseFormat.icl (Figure 29). If set to 'Y', the Vendor Purchase Lead Time will be included in the hierarchy when calculating lead time.

The screenshot shows a window titled "EIP Configuration Maintenance" with a toolbar containing icons for checkmark, close, delete, and help. Below the title bar, it says "File: Base Format [BaseFormat.icl]". The main area is a table with the following content:

Parameter	poCheckVendorLeadTime
Description	PO Required Date Calc Check Vendor Lead Time
Value	N
	Y=Yes N=No
	If Yes, when recalculating a PO Required Date, check the Vendor Purchase Lead Time within the lead time hierarchy.
