Requisition Approval

Introduction

Provide the ability to enter and approve Requisition Requests. The approval process will copy the Requisition information to the Suggested Purchase Order file for inclusion in a Purchase Order.

Objective

Perform the following changes to allow Requisition Request processing:

- Add a Requisition Request option to the Vendor portal.
- Create a new Requisition Request table similar to the Suggested Purchase Order table with additional columns for the approval process.
- Create a view over the Requisition Request and Suggested Purchase Order tables.
- Create a list widget over the new view providing all standard customization.
- Exit Points will be created for pre and post updates to the Requisition Request table and also for the setting of the Requisition Number.
- Copy the 'INT' comments from the Requisition Comments (PORQCM) to the Purchase Order Detail Comments (POOCMT) when the requisition is added to a purchase order.

Scope

This project will be designed and delivered with the following release and version levels:

HarrisData HD5.0 115166
IBM i V7R1M0

This project will be based on the HTML User Interface. The Legacy User Interface will continue to work as it does today.

Minor changes may be made to the design as the enhancement is coded. These changes are made to correct issues discovered in developing the enhancement that were not found during the design. If any changes are made they will be included in the copy of the design you receive with the final product delivery. This design will also serve as your documentation until the User Documentation is updated.

Requisition Approval

Programming Requirements

Requisition Request

When the Requisition Request option is selected from the Vendor portal, the following Requisition Request list widget (Figure 1) will be displayed and provide the following functionality:

- All standard list widget customization is available
- User view on Buyer, Vendor, Warehouse and Product Class
- Program Option Security using program HPORQR_W for Add, Change, Delete, Copy and Approve
 - Note: the Copy option will only copy the Requisition Number and Item Number to the add page (Figure 2). No other fields will be copied.

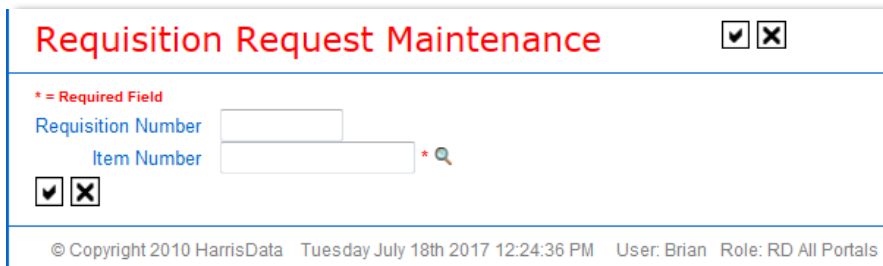

Figure 1

Requisition Approval

Requisition Request Maintenance

The Requisition Request Maintenance (Figure 2) is displayed when the add icon is selected from the Requisition Request list widget (Figure 1) and will have the following functionality:

- Requisition Number
 - Cannot already exist in the Suggested PO (POSGPO)
 - Is required, but can be left blank if the exit point (PO.REQ.NUMBER) will default it. The exit point can change the entered value.
- Item Number
 - Required
 - Value can be a stock or non-stock item

The screenshot shows a web form titled "Requisition Request Maintenance" in red text. Below the title is a legend indicating that a red asterisk (*) denotes a required field. The form contains two input fields: "Requisition Number" and "Item Number". The "Requisition Number" field is followed by a red asterisk, and the "Item Number" field is followed by a red asterisk and a magnifying glass icon. At the bottom of the form, there is a footer containing copyright information, the date and time (Tuesday July 18th 2017 12:24:36 PM), the user name (User: Brian), and the role (Role: RD All Portals).

Figure 2

Requisition Approval

Stock Item

A stock item entered on Figure 2 will display the following Requisition Request Maintenance page (Figure 3) with the following fields:

- Display only
 - Requisition Number
 - Item Number
 - Defaults from Item table (HDIMST)
 - Item Description
 - Stocking Unit Of Measure
 - Product Class
- Description – Allows user to enter a short description of the request
- Required fields:
 - Quantity
 - Required Date
 - Warehouse Number
- Optional fields:
 - Buyer Number
 - Vendor Number
 - Comments
- Buyer Number and Vendor Number will default from Item/Whs (HDIWHS) if not entered
- Cost will default

Requisition Request Maintenance [Icons]

Figure 3

Requisition Approval

Non-Stock Item

A non-stock item entered on Figure 2 will display the following Requisition Request Maintenance page (Figure 4) with the following fields:

- Display only
 - Requisition Number
 - Item Number
- Description – Allows user to enter a short description of the request
- Required fields:
 - Item Description
 - Quantity
 - Required Date
 - Warehouse Number
 - Purchasing Unit Of Measure
- Optional fields:
 - Vendor Item Number
 - Buyer Number
 - Vendor Number
 - Comments

The screenshot shows a web-based form titled "Requisition Request Maintenance" in red text. The form contains various input fields for requisition details. A legend indicates that fields marked with a red asterisk (*) are required. The fields and their values are as follows:

Field	Value	Required
Requisition Number	RQ000005	No
Description	This is a test requisition for a non-stock item	No
Item Number	NONSTOCKITEM	No
Item Description	Non-stock description	Yes
Vendor Item Number		No
Cost	.00000	No
Purchasing Unit Of Measure		Yes
Quantity	75.0000	Yes
Required Date	102717	Yes
Warehouse Number	11	Yes
Buyer Number	5	No
Vendor Number	111	No
Mfg Order Number		No
Routing Sequence	0	No
Comments	This is a comment that will be copied to the Purchase Order detail line comment when the Requisition Request has been approved and added to the Purchase Order.	No

Below the form, there is a text box containing the following message: "This is a comment that will be copied to the Purchase Order detail line comment when the Requisition Request has been approved and added to the Purchase Order."

Figure 4

Requisition Approval

Requisition Approval

The Requisition Approval page (Figure 5) will either display all unapproved items for the selected Requisition Number or display the specific Item Number when the thumbs up icon is selected from the list widget (Figure 1).

Figure 5

When the Accept icon is selected, the confirmation box (Figure 6) will be displayed. If OK is selected, the following will occur:

- A Suggested PO (POSGPO) row will be created based on the approved Requisition Request.
- The Requisition Request (POREQR) Approved by User ID will be set to the current user and the Approved Timestamp will be updated with the current timestamp.

Confirm Approval of Requisitions

OK Cancel

Figure 6

Requisition Approval

Legacy Requisition Maintenance

Change legacy Requisition Maintenance (HPORQU) when adding a row to check the new Requisition Request table (POREQR) and not allow a duplicate Requisition Number.

Purchase Order/Receipt Entry

Change the legacy Purchase Order/Receipt Entry program (HPOSPO) to copy the Document Type 'INT' comments from the Requisition Comments (PORQCM) to the Purchase Order Detail Comments (POOCMT) when the requisition is added to a purchase order.
